Objective

Results-driven Flutter Developer with 2.5+ years of experience building high-performance cross-platform mobile applications for Android and iOS. Skilled in Flutter, Dart, Firebase, REST API integration, and scalable application architecture. Passionate about crafting intuitive user experiences, writing maintainable code, and delivering production-ready solutions that create measurable business impact. Currently expanding expertise in FastAPI and backend development to become a full-stack mobile engineer.

Skills

Languages: Dart, JavaScript, HTML, CSS

Frameworks: Flutter, React Native, React JS

State Management: GetX, Bloc, Provider

Backend & APIs: REST APIs, Firebase, FastAPI (Learning)

Architecture: Clean Architecture, MVVM, MVC

Tools: Git, GitHub, Figma, VS Code, Android Studio

Testing: Unit Testing, Widget Testing

Deployment: Google Play Store, Apple App Store

Experience

Flutter Developer

Apr 2025 – Present

Ekodemy Pvt. Ltd. – Remote, India

- Architected and developed cross-platform mobile applications for Android and iOS using Flutter, implementing Clean Architecture, reusable component libraries, and scalable code structures that accelerated feature delivery and simplified long-term maintenance.
- Integrated REST APIs, Firebase services, push notifications, and third-party SDKs while managing production releases on Google Play Store and Apple App Store, ensuring reliable performance, seamless user experiences, and successful client deployments.

Flutter Developer

Jun 2024 – Mar 2025

Qwetzal Technologies Pvt. Ltd. – Dehradun, India

- Developed responsive and feature-rich business applications using Flutter, building reusable widgets, authentication flows, and dynamic data-driven interfaces that improved development efficiency and application consistency.
- Collaborated with cross-functional teams in Agile environments to design application architecture, integrate backend services, troubleshoot complex issues, and deliver high-quality features while adhering to clean coding and version control best practices.

Projects

School Box – Customer & Delivery App

- Built a dual-app tiffin/meal subscription platform in Flutter: a customer app for browsing menus, managing subscriptions, and placing daily/weekly orders, and a delivery app for order assignment and drop-off confirmation.
- Implemented real-time order tracking, Firebase push notifications, and secure payment/subscription flows, along with an admin dashboard for order scheduling.

Mentora – Mental Health & Wellbeing App

- Developed a mental health and wellbeing app in Flutter offering mood tracking, guided journaling, and meditation content to support users' daily wellness routines.
- Designed a calming, accessible UI with mood-history visualizations and used Firebase for secure, private storage of sensitive user data.

Pub Meme – Meme Sharing App

- Built a social meme app in Flutter enabling users to browse a shareable feed, create custom memes with an in-app editor, and download or share content to other platforms.
- Implemented efficient image caching for smooth infinite-scroll feeds and used Firebase for content storage, accounts, and engagement analytics.

Education

Bachelor of Arts (B.A.)

2024

Indira Gandhi National Open University (<https://www.ignou.ac.in/>)

Diploma in Web Designing & Mobile Development

2023

PARAS Infotech (<https://parasinfotech.in>)
